

# Adith Balamurugan

8501 High Meadows Dr Plano, TX 75025  
972.265.9471 | abala@berkeley.edu

## EDUCATION

### U.C. BERKELEY

BACHELORS IN COMPUTER SCIENCE

BACHELORS IN STATISTICS

Expected May 2018 | Berkeley, CA

Kraft Award for Freshmen 2015-16

Dean's List

Cum. GPA: 3.91

### TEXAS ACADEMY OF MATH AND SCIENCE (TAMS)

(UNIVERSITY OF NORTH TEXAS)

Grad. May 2015 | Denton, TX

Summer Research Scholarship

National Merit Finalist

President's List

Cum. GPA: 4.0 / 4.0

## COURSEWORK

### UNDERGRADUATE

Real Analysis

Data Structures

Machine Structures

Discrete Math & Probability Theory

Artificial Intelligence

Efficient Algorithms

Database Management

Machine Learning

Combinatorics & Randomized Algorithms

Operating Systems

Game Theory

Time Series

## SKILLS

### PROGRAMMING

Frequent Use:

Python • Java • Git •  $\LaTeX$  • Unix

Familiar:

C • C++ • C# • R • SQL/Databases

Tensorflow • HTML • CSS • JS

## LITERATURE

### THEORY MEETS DATA

Co-AUTHOR | 2015-16

Statistics 88 Course Textbook | A Data  
Scientist's Handbook to Statistics

## EXPERIENCE

### JCPENNEY | DIGITAL ANALYST + BIG DATA INTERN

June 2016 – August 2016 | Plano, TX

- Worked with Big Data Scrum team on Market Basket Analysis for the “.com” channel using analytic tools such as Datameer.
- Analysis on Customer Order trends to power more intelligent product suggestions and recommendations

### TRULYMAD INC. | DATA ENTRY + ANALYST INTERN

September 2015 – December 2015 | Berkeley, CA

- Uploading new products pages
- Research prior sales to determine optimal merchandise pricing and inventory for upcoming seasons.
- Assisted in Web Development and UI design.

## UNIVERSITY / RESEARCH

### IMAGE AND VIDEO PROCESSING LAB | RESEARCH ASSISTANT

April 2017 – Present | Berkeley, CA

Research with Dr. **Avideh Zakhor** focused in image processing. Collaboration with researchers in UIUC and Cornell. Explore AR applications in mapping indoor spaces

- Developing algorithms to determine height of certain crops from provided images and distance specifications
- Building and improving an RCNN for object recognition in images.
- Processing point clouds into meshes to perform feature extraction

### DATA 8 | UGSI

August 2017 – Present | Berkeley, CA

Responsibilities include course development, running lab/discussion section, and holding office hours.

### STATISTICS 88 | HEAD TEACHING ASSISTANT

August 2016 – December 2016 | Berkeley, CA

Worked with Professor **Alexander D'Amour**. Responsibilities included holding office hours, editing course text, and writing and grading assignments and quizzes.

### 3D TELE-IMMERSION LAB | RESEARCH ASSISTANT

May 2014 – August 2014 | Richardson, TX (University of Texas, Dallas)

Researched with Dr. **Balakrishnan Prabhakaran**. Worked with Microsoft Kinect and Visual Studio, using C++ and C# programming with Unity. Explored the areas for improvement in remote medical practice using skeleton and mesh interactions in virtual space.

## PROJECTS

### ALLPAY | SECURE CLIENT-SIDE PAYMENT GATEWAY | FINALIST

Money 20/20 Hackathon | October 2015 | Las Vegas, NV

Payment gateway using Vantiv API which works alongside shopping systems and accepts any mobile wallet.

### SPEEDUP | HAPTIC FEEDBACK FOR APPOINTMENT KEEPING | FINALIST

CalHacks 2.0 | October 2015 | Berkeley, CA

Haptic feedback in shoe if running late to appointment and are travelling by foot. The frequency of feedback is inversely related to tardiness.
